MODULE 06

Full Stack Development

Go from 'I can code' to 'I can build and deploy'

LEARN A SKILL • BUILD PROOF • CREATE YOUR NEXT OPPORTUNITY

Learn frontend, backend, databases, APIs, authentication, security and deployment as one complete career skill.

WHO CAN JOIN?

Students, freshers, non-IT graduates, career switchers, freelancers and aspiring full-stack developers.

WHY STUDENTS CHOOSE THIS PATH

- Beginner-friendly learning path — start with the fundamentals and progress step by step.
- Practical, project-focused training — learn by building instead of only watching lectures.
- Career-oriented skills — connect every topic to real applications and workplace use.
- Portfolio advantage — finish with projects you can discuss in interviews.
- A new direction is possible — your previous degree does not have to decide your entire career.

MODULE CONTENT

HTML/CSS/JavaScript	React
Responsive UI	Node.js
Express.js	REST APIs
Middleware	Authentication
Authorization	JWT
Sessions/cookies	File uploads
Email services	MySQL
PostgreSQL	MongoDB
Redis basics	CRUD
Postman	Password hashing
CORS	CSRF
XSS	SQL Injection
Rate limiting	Validation
Git/GitHub	Docker
Environment variables	CI/CD basics
Vercel/Netlify	AWS/Azure basics

HANDS-ON PROJECTS

- E-commerce Platform
- Food Delivery App
- Job Portal
- Learning Management System

- Social Media App
- Hospital Management
- AI Web App

CAREER DIRECTIONS

Full Stack Developer • Backend Developer • Web Application Developer • Startup/Product Developer

YOUR JOURNEY

Learn → Practice → Build → Create a portfolio → Prepare for interviews → Apply your skills in real-world situations.

Note: Training improves skills and employability; employment depends on individual preparation, portfolio quality, interviews and available opportunities.
