MODULE 07

DBMS & Relational Databases

Become the person who understands where application data lives

LEARN A SKILL • BUILD PROOF • CREATE YOUR NEXT OPPORTUNITY

SQL and database skills are used across software, banking, healthcare, e-commerce, government and enterprise systems.

WHO CAN JOIN?

Students, freshers, developers, data beginners, non-IT learners and placement candidates.

WHY STUDENTS CHOOSE THIS PATH

- Beginner-friendly learning path — start with the fundamentals and progress step by step.
- Practical, project-focused training — learn by building instead of only watching lectures.
- Career-oriented skills — connect every topic to real applications and workplace use.
- Portfolio advantage — finish with projects you can discuss in interviews.
- A new direction is possible — your previous degree does not have to decide your entire career.

MODULE CONTENT

DBMS vs RDBMS	Architecture
Tables/records/fields	Keys & constraints
SQL CRUD	Filtering/sorting/grouping
Joins	Subqueries
CTEs	Views
Stored Procedures	Functions
Triggers	ER diagrams
Relationships	Cardinality
Normalization	Indexes
Transactions	ACID
Concurrency	Locks
Deadlocks	Backup/recovery
Replication	Partitioning
MySQL	PostgreSQL
SQL Server	Oracle basics
MongoDB	Redis

HANDS-ON PROJECTS

- Banking Database
- Hospital Database
- E-commerce Database
- Student Management Database

CAREER DIRECTIONS

SQL Developer • Database Developer • Backend Developer • Data Analyst Beginner

YOUR JOURNEY

Learn → Practice → Build → Create a portfolio → Prepare for interviews → Apply your skills in real-world situations.

Note: Training improves skills and employability; employment depends on individual preparation, portfolio quality, interviews and available opportunities.
