MODULE 08

Computer Networks

Understand the invisible infrastructure behind the Internet

LEARN A SKILL • BUILD PROOF • CREATE YOUR NEXT OPPORTUNITY

Go from 'what is an IP?' to understanding how devices communicate, how networks are designed and how they are secured.

WHO CAN JOIN?

Students, freshers, cybersecurity beginners, IT support aspirants, non-IT learners and technical-role candidates.

WHY STUDENTS CHOOSE THIS PATH

- Beginner-friendly learning path — start with the fundamentals and progress step by step.
- Practical, project-focused training — learn by building instead of only watching lectures.
- Career-oriented skills — connect every topic to real applications and workplace use.
- Portfolio advantage — finish with projects you can discuss in interviews.
- A new direction is possible — your previous degree does not have to decide your entire career.

MODULE CONTENT

LAN/WAN/MAN	Topologies
OSI	TCP/IP
Network devices	TCP/UDP
HTTP/HTTPS	FTP
SMTP	DNS
DHCP	SSH
ICMP	IPv4/IPv6
Public/private IP	MAC
Subnetting	CIDR
Gateway	Switches
Routers	VLAN
NAT	Routing
ARP	Firewalls
VPN	Proxy
IDS/IPS	Zero Trust
Segmentation	Cisco Packet Tracer
Wireshark	Ping
Traceroute	Nmap
nslookup	netstat

HANDS-ON PROJECTS

- College Network Design
- Enterprise Network Simulation
- Network Monitoring System

CAREER DIRECTIONS

Network Support Engineer • Junior Network Engineer • Cybersecurity Beginner • IT Support Engineer

YOUR JOURNEY

Learn → Practice → Build → Create a portfolio → Prepare for interviews → Apply your skills in real-world situations.

Note: Training improves skills and employability; employment depends on individual preparation, portfolio quality, interviews and available opportunities.
