MODULE 09

Cybersecurity

Turn your interest in hacking into a professional security career

LEARN A SKILL • BUILD PROOF • CREATE YOUR NEXT OPPORTUNITY

Learn how attacks happen, how defenders detect them and how organizations protect systems through ethical, controlled labs.

WHO CAN JOIN?

Students, freshers, non-IT graduates, career switchers, IT support learners and cybersecurity enthusiasts.

WHY STUDENTS CHOOSE THIS PATH

- Beginner-friendly learning path — start with the fundamentals and progress step by step.
- Practical, project-focused training — learn by building instead of only watching lectures.
- Career-oriented skills — connect every topic to real applications and workplace use.
- Portfolio advantage — finish with projects you can discuss in interviews.
- A new direction is possible — your previous degree does not have to decide your entire career.

MODULE CONTENT

Cybersecurity fundamentals	CIA Triad
Threats/vulnerabilities/risks	Attack surface
Threat actors	Cyber Kill Chain
MITRE ATT&CK	TCP/IP security
Ports	Sniffing
Packet analysis	Reconnaissance
OSINT	Scanning
Enumeration	Vulnerability assessment
Ethical exploitation concepts	Post-exploitation concepts
OWASP Top 10	SQL Injection
XSS	CSRF
Broken Access Control	API Security
Kali Linux	Nmap
Wireshark	Burp Suite
Metasploit	Gobuster
Nikto	John the Ripper
Hashcat	Splunk
SIEM	Alert investigation
Incident Response	IOC analysis
Phishing	Digital Forensics

Cloud Security	IAM

HANDS-ON PROJECTS

- SOC Dashboard
- Phishing Email Analyzer
- Vulnerability Scanner
- Network Monitoring Lab
- Web Security Lab
- Malware Analysis Lab

CAREER DIRECTIONS

SOC Analyst • Cybersecurity Analyst • Junior Security Engineer • Security Operations Trainee

YOUR JOURNEY

Learn → Practice → Build → Create a portfolio → Prepare for interviews → Apply your skills in real-world situations.

Note: Training improves skills and employability; employment depends on individual preparation, portfolio quality, interviews and available opportunities.
