12 Weeks

8 Modules

5 Internships

Virtual Company Sessions

3 Months (12 Weeks)	Mon–Fri: Live Technical Classes Sat: Career Sessions Sun: Virtual Interactive Sessions	100% Online — Live Virtual Classroom (Zoom / Google Meet)	3 Company Experts (Python/Data, AWS/Cloud, DevOps/ServiceNow)

DAY	TYPE	WHAT HAPPENS
Mon–Fri	■ Live Technical Class	Core module topics with hands-on labs and exercises over live video call
Saturday	■ Career Session	Rotating: Resume / LinkedIn / Job Strategy (each week) — live online workshop
Sunday	■ Virtual Interactive Session	Online: GD + Mock Interviews + Fun Activities via video breakout rooms

Programme Overview & Unique Features (Online Format)

Python Foundations	Scripting, automation, OOP — the backbone of all modern IT roles
Data Science Essentials	NumPy, Pandas, Matplotlib, Seaborn, ML with scikit-learn
AWS Cloud	EC2, S3, IAM, VPC, RDS, Lambda, CloudWatch — Free Tier labs (via screen-share + remote lab access)
DevOps Engineering	Linux, Git, Docker, Jenkins, CI/CD pipelines, Prometheus + Grafana
ServiceNow Administration	ITSM, Incident/Change/Problem Mgmt, Workflow Automation
Real Projects	End-to-end capstone project per student — deployed, documented, demo-ready, presented live online
Interview Preparation	Resume, LinkedIn, mock interviews, GD, technical Qs, HR rounds — all conducted via video call
Placement Assistance	Job referrals, virtual company sessions, internship selection for TOP 5 students

What Makes This Online Programme Different

- Every Saturday rotates between Resume Optimization, LinkedIn Strategy, and Job Search Strategy — live online, so career skills compound alongside technical ones.
- Every Sunday is a virtual interactive session hosted over video call — GD + mock interviews in breakout rooms build real confidence, no travel required.
- Virtual company sessions and live webinars with professionals from companies operating out of Rushikonda IT Park and VSEZ give students firsthand exposure to how IT companies operate.
- Top 5 students (selected after Week 11 internship interviews) receive confirmed internship placement with partner companies — interviews conducted online.
- 3 Company domain experts teach their specialization live online — students get depth, not a generalist course.
- No prior coding experience required — we start from absolute zero and reach deployment-ready in 12 weeks, entirely from home.

MONTH 1 — Python & Data Science Foundations (Weeks 1–4)

Week 1: Python Foundations — Basics & Environment

Mon	Kickoff & Orientation	Program overview, meet teachers, GitHub account setup, VS Code + Python install, course roadmap walkthrough — live online session
Tue	Python Basics I	Variables, data types, input/output, type conversion, basic operators, string formatting
Wed	Python Basics II	Conditionals (if/elif/else), comparison & logical operators, nested conditions
Thu	Python Loops	for loops, while loops, range(), break/continue/pass, loop patterns & exercises
Fri	Functions & Modules	Defining functions, parameters, return values, *args/**kwargs, importing modules (math, os, sys)
Sat	Resume Optimization I RESUME	ATS-friendly formatting, action verbs, quantifying achievements, fresher resume template workshop — live peer review in virtual breakout pairs
Sun	Fun + Interview Prep I ONLINE	Live online session via video call: HR mock interviews, personal introduction drill, icebreaker games, team activity in breakout rooms

Week 2: Python Intermediate — Data Structures

Mon	Lists & Tuples	List methods, slicing, unpacking, list comprehensions, tuple immutability
Tue	Dictionaries & Sets	Dict creation/access, .get()/update(), nested dicts, set operations, real-world use cases
Wed	File Handling	Open/read/write/append files, CSV reading with csv module, exception handling (try/except/finally)
Thu	OOP I	Classes, objects, __init__, instance vs class variables, methods, self keyword
Fri	OOP II + Mini Project	Inheritance, polymorphism, encapsulation; build a Student Management CLI app
Sat	LinkedIn Optimization I LINKEDIN	Profile headline, About section writing, skills endorsement strategy, profile photo tips, LinkedIn SSI score walkthrough — live online
Sun	GD + Interview II ONLINE	Group Discussion: 'Remote Work vs Office Work'; online mock interview circuit; team quiz on Python concepts — via video call breakout rooms

Week 3: Data Science Essentials I

Mon	NumPy Foundations	Arrays, array operations, slicing, broadcasting, common NumPy functions (mean, std, reshape)
Tue	Pandas I	DataFrames, Series, reading CSV/Excel, .head()/info()/describe(), selecting columns/rows
Wed	Pandas II	Filtering, sorting, groupby, merge/join, handling missing values, value_counts()
Thu	Data Visualization I	Matplotlib: line, bar, scatter plots, labels, titles, subplots, saving figures
Fri	Data Visualization II	Seaborn: heatmaps, pair plots, distribution plots; plot storytelling for presentations
Sat	Job Strategy Session I JOB	Job portals deep dive (LinkedIn Jobs, Naukri, Instahyre), Boolean search strings, applying smartly, tracking applications with a sheet — live online
Sun	GD + Fun III	GD Topic: 'Data is the new oil'; online meetup via video call; team games, resume swap & critique in breakout rooms

Week 4: Data Science Essentials II + EDA Project

Mon	Statistics for Data Science	Mean, median, mode, variance, std, correlation, normal distribution, box plots
Tue	Exploratory Data Analysis (EDA)	End-to-end EDA workflow: dataset loading → cleaning → analysis → visual storytelling
Wed	ML Concepts Overview	Supervised vs unsupervised learning, train/test split, overfitting, common algorithms overview
Thu	Scikit-learn Basics	Linear regression, logistic regression, classification report, confusion matrix with scikit-learn
Fri	Mini Data Project	End-to-end: Titanic or House Price dataset — clean, analyze, model, present findings
Sat	Resume Optimization II RESUME	Adding projects & internships effectively, GitHub links, certifications, profile summary refinement — live mock recruiter screening online
Sun	Technical Interview I ONLINE	Live technical Q&A;; Python + Data Science basics; online session via video call; debrief + feedback round

MONTH 2 — AWS Cloud & DevOps Engineering (Weeks 5–8)

Week 5: AWS Cloud — Core Services

Mon	Cloud Computing Fundamentals	What is cloud, IaaS/PaaS/SaaS, AWS global infrastructure, regions & AZs, AWS Free Tier setup
Tue	EC2 Deep Dive	Launching instances, AMIs, instance types, key pairs, user data scripts, stop/start/terminate — via remote lab access
Wed	S3 Storage	Buckets, objects, versioning, static website hosting, bucket policies, presigned URLs
Thu	IAM — Identity & Access	Users, groups, roles, policies (managed vs inline), MFA, least privilege principle, IAM best practices
Fri	VPC Networking	VPC, subnets (public/private), Internet Gateway, route tables, Security Groups, NACLs
Sat	LinkedIn Optimization II LINKEDIN	Posting strategy, engaging with recruiters, LinkedIn job alerts setup, InMail templates, alumni network outreach — live online
Sun	GD + Interview IV ONLINE	GD: 'Cloud Computing — Future of IT'; online meetup; AWS quiz bee, team cloud architecture challenge via video call

Week 6: AWS — Advanced & Architecture

Mon	RDS & Databases on AWS	RDS setup, MySQL on RDS, read replicas, multi-AZ, backups, DynamoDB intro
Tue	Load Balancing & Auto Scaling	ALB vs NLB, target groups, health checks, Auto Scaling Groups, launch templates
Wed	Lambda & Serverless	Lambda functions, triggers, event sources, S3+Lambda integration, CloudWatch logs
Thu	CloudWatch & Monitoring	Metrics, alarms, dashboards, log groups, SNS notifications, billing alerts
Fri	AWS Project — Deploy a 3-Tier App	Deploy a Python Flask app on EC2 with RDS backend, behind an ALB — full architecture diagram
Sat	Job Strategy Session II JOB	Cold emailing templates, LinkedIn connection messages, referral strategies, IT company list in Vizag + Hyderabad — live online
Sun	Fun + Tech Interview V ONLINE	AWS mock interview: scenario-based Qs; online meetup via video call; group cloud architecture sketching contest in breakout rooms

Week 7: DevOps Engineering I — Linux & Git

Mon	Linux Fundamentals	Filesystem, essential commands (ls, cd, cp, mv, rm, chmod, chown), users & permissions, SSH
Tue	Linux Advanced	Package management (apt/yum), cron jobs, systemd services, grep/awk/sed, shell scripting basics
Wed	Git & GitHub I	Init, add, commit, push, pull, clone, .gitignore, branches — the Git mental model
Thu	Git & GitHub II	Merge, rebase, pull requests, resolving conflicts, tags, GitHub Actions intro
Fri	Bash Scripting for DevOps	Variables, loops, conditionals in bash; write a server health-check script; deploy.sh patterns
Sat	Resume Optimization III RESUME	DevOps/Cloud resume specifics, adding AWS/Linux projects, certification badges, tailoring for JD — live ATS score test online

Sun	GD + Interview VI ONLINE	GD: 'DevOps is killing the sysadmin role'; online session; Linux commands quiz, bash scripting live challenge via video call
------------	---	--

Week 8: DevOps Engineering II — Docker & CI/CD

Mon	Docker I	What is containerization, Docker architecture, Dockerfile, build & run images, port mapping
Tue	Docker II	Docker volumes, networks, Docker Compose, multi-container apps, pushing to Docker Hub
Wed	Jenkins I	Installing Jenkins, jobs, builds, pipelines, connecting GitHub to Jenkins, webhooks
Thu	Jenkins II + CI/CD Pipeline	Build a complete CI/CD pipeline: GitHub → Jenkins → Docker build → EC2 deploy
Fri	Monitoring with Prometheus & Grafana	Install Prometheus, exporters, scrape configs, Grafana dashboards — monitor a live EC2 app remotely
Sat	LinkedIn Optimization III LINKEDIN	LinkedIn Featured section — adding project demos, certifications; LinkedIn newsletters; content calendar for tech posting — live online
Sun	Mock Interview + GD VII ONLINE	Full DevOps technical mock interview; online session via video call; Grafana dashboard showcase; team CI/CD quiz in breakout rooms

MONTH 3 — ServiceNow, Capstone & Career Launch (Weeks 9–12)

Week 9: ServiceNow Administration I

Mon	ServiceNow Platform Overview	What is ITSM, ServiceNow UI navigation, applications & modules, admin vs user roles
Tue	Incident Management	Creating/resolving incidents, priority matrix, SLAs, escalation rules, incident reporting
Wed	Change & Problem Management	Change Advisory Board (CAB), RFC workflow, problem records, root cause analysis
Thu	Service Catalog & Requests	Catalog items, record producers, approval workflows, variables and order guides
Fri	Workflow Automation	Flow Designer, Workflow Editor, email notifications, approval automation, business rules
Sat	Job Strategy Session III JOB	Salary negotiation basics, offer letter reading, background verification, IT career ladder roadmap, government IT jobs overview — live online
Sun	GD + Interview VIII ONLINE	GD: 'ITSM — Is ServiceNow worth the hype?'; online meetup; ServiceNow scenario roleplay as IT analyst via video call

Week 10: ServiceNow II + Integration Capstone Setup

Mon	Reporting & Dashboards	Performance Analytics, building dashboards, scheduled reports, KPI widgets for management
Tue	ServiceNow Integrations	REST API basics, connecting ServiceNow to Slack/email, webhook triggers, MID Server concept
Wed	Capstone Project Kickoff	Students choose capstone: Cloud Infra Setup / Data Analysis Dashboard / DevOps Pipeline / ITSM Workflow
Thu	Capstone Sprint I	Architecture design, GitHub repo creation, task breakdown, mentor review of plan — live online 1-on-1 check-ins
Fri	Capstone Sprint II	Core implementation begins — hands-on coding/infra; teacher-led code/infra review checkpoints via screen-share
Sat	Final Resume Polish RESUME	1-on-1 resume reviews with all 3 teachers; finalize GitHub profile & portfolio links; LinkedIn headline audit — live online
Sun	Mock HR + Fun IX ONLINE	HR interview simulation online; video call session; stress-test soft skills, body language coaching, group feedback in breakout rooms

Week 11: Capstone + Interview Bootcamp

Mon	Capstone Sprint III	Feature completion, debugging sessions, peer testing, documentation writing (README, architecture)
Tue	Capstone Sprint IV	Final refinements, demo prep, slide preparation (max 5 slides per student)
Wed	Technical Interview Bootcamp I	Data structures Q&A; Python puzzles, SQL basics, system design fundamentals (L1 level)
Thu	Technical Interview Bootcamp II	AWS scenario questions, DevOps troubleshooting scenarios, live coding on shared screen
Fri	Mock Company Presentations	Each student presents capstone to a panel — simulates a real final-round interview presentation, via video call

Sat	Job Strategy Session IV + Virtual Company Visit Prep JOB	Etiquette for virtual company sessions, what to observe, questions to ask, professional presentation on camera, briefing on partner companies in Vizag IT parks
Sun	Final GD + Panel X ONLINE	Grand GD: 'Tech careers in Tier-2 cities like Vizag, now going fully remote'; Panel of all 3 teachers as evaluators, online celebration session

Week 12: Virtual Company Sessions, Internship Selection & Graduation

Mon	Virtual Company Session I	Live webinar/virtual session with 1–2 IT companies in Vizag (Rushikonda / VSEZ): observe operations, network with engineers, Q&A; session online
Tue	Virtual Company Session II	Second live company webinar / virtual company tour; debrief session — learnings, notes, follow-up emails practice
Wed	Internship Interviews	Top 8–10 shortlisted students present to company partners online; evaluated on project, communication, attitude
Thu	Final Capstone Demo Day	Open online demo day — all students present capstone projects live; invited guests (HRs, startup founders, alumni) join via video call
Fri	Internship Announcement & Graduation	Top 5 students selected for paid/unpaid internships; certificates of completion for all; online graduation ceremony + virtual group photo
Sat	Post-Program Job Strategy JOB	30-60-90 day job search plan, follow-up cadence, staying active on LinkedIn, alumni network activation, referral system — live online
Sun	Grand Finale Celebration ONLINE	Online farewell & celebration via video call; appreciation awards, superlative awards, group video, virtual send-off, goodbye messages

Saturday Career Sessions — Full Calendar (Live Online)

Week	Saturday Theme	Key Activities
Week 1	Resume Optimization I	ATS formatting, action verbs, quantifying impact, live peer review
Week 2	LinkedIn Optimization I	Headline, About, Skills, SSI Score, photo tips
Week 3	Job Strategy I	Portals, Boolean search, application tracker setup
Week 4	Resume Optimization II	Projects section, GitHub links, certifications, mock recruiter screen
Week 5	LinkedIn Optimization II	Posting strategy, recruiter InMail, alumni outreach, job alerts
Week 6	Job Strategy II	Cold email templates, referral playbook, Vizag + Hyd company list
Week 7	Resume Optimization III	DevOps/Cloud resume, ATS score test, tailoring for JD
Week 8	LinkedIn Optimization III	Featured section, certifications display, tech content calendar
Week 9	Job Strategy III	Salary negotiation, offer letters, IT career ladder, govt IT jobs
Week 10	Final Resume Polish	1-on-1 reviews with 3 teachers, GitHub + portfolio audit
Week 11	Job Strategy IV + Virtual Company Session Prep	Etiquette, what to observe, on-camera presentation briefing
Week 12	Post-Program Job Strategy	30-60-90 day plan, follow-up cadence, alumni network

Sunday Virtual Sessions — Full Calendar (Online via Video Call)

Week	GD Topic / Activity	Interview Focus
Week 1	Icebreakers + Personal Intro	HR: Self-introduction, strengths
Week 2	GD: Remote vs Office Work	Python Q&A; peer review
Week 3	GD: Data is the new oil	Data Science Q&A;
Week 4	Technical circuit mock interview	Python + Data Science combined
Week 5	GD: Cloud is the future	AWS scenario questions
Week 6	Cloud architecture sketch challenge	AWS deep-dive Qs
Week 7	GD: DevOps killing the sysadmin?	Linux + Git Q&A;
Week 8	Grafana dashboard showcase	Full DevOps mock interview
Week 9	GD: Is ServiceNow worth it?	ITSM scenario roleplay
Week 10	HR simulation online	Soft skills, body language
Week 11	Grand GD: Tech in Tier-2 cities, going remote	Panel: all 3 teachers as evaluators
Week 12	Grand Finale Celebration (Online)	Appreciation awards, virtual send-off

Internship Selection Process — Top 5 Students (Online Evaluation)

Phase 1 — Continuous Assessment (Weeks 1–10)

Teachers maintain a performance tracker covering: attendance, lab completion, assignment scores, capstone progress, and participation in Saturday sessions and Sunday virtual sessions.

Phase 2 — Shortlisting (Week 11, Wednesday)

Top 8–10 students are shortlisted based on overall score. Shortlisted students attend formal internship interviews online with company partner representatives.

Phase 3 — Interview Round (Week 11, Wednesday)

Each shortlisted student presents their capstone project + answers technical and HR questions via video call before a panel of company evaluators and all 3 teachers.

Phase 4 — Selection & Announcement (Week 12, Friday)

Top 5 students are announced at the online graduation ceremony and receive internship offer letters. All other students receive a Certificate of Completion.

Evaluation Criteria (Internship Selection)

Criteria	Weight	How It's Measured
Capstone Project Quality	30%	Architecture, code quality, documentation, deployment
Technical Knowledge	25%	Mock interview + internship interview scores
Attendance & Consistency	15%	Mon–Sun online attendance rate across 12 weeks
Career Readiness	15%	Resume quality, LinkedIn profile, job-readiness assessment
Communication & GD Skills	15%	Sunday virtual GD participation, presentation delivery, teamwork

Tools & Technologies Covered

Languages	Python 3, Bash/Shell Scripting, SQL basics
Data & ML	NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebooks
Cloud	AWS (EC2, S3, IAM, VPC, RDS, Lambda, CloudWatch, Auto Scaling, ALB) — accessed via remote lab environment
DevOps	Git, GitHub, Linux (Ubuntu), Docker, Docker Compose, Jenkins, Prometheus, Grafana
ITSM	ServiceNow (ITSM, Flow Designer, Service Catalog, Reporting, REST API)
Dev Tools	VS Code, PyCharm, Postman, DBBeaver, Terminal/SSH — installed on student's own system
Career Tools	Resume templates, LinkedIn, Naukri, Instahyre, GitHub Portfolio
Online Platform	Zoom / Google Meet for live classes, breakout rooms for GD & mock interviews, shared cloud drive for recordings & resources
